Election/Restriction

The abstract of the disclosure is objected to because it is not limited to 250 words in length on one separate sheet . Correction is required. See MPEP § 608.01(b).

The numbering of claims is not accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 35 and 34 have been renumbered 34 and 35, respectively.

This application contains claims directed to the following patentably distinct species of the claimed invention:

A : claims 2-7 drawn to a backlighting panel comprising a layer of electroluminescent material according to Figs. 14 and 14 A.

B : claims 8-35 drawn to a backlighting panel comprising polymer-dispersed liquid crystal panels as the light diffusing structure according to Figs. 3, 5 and 11-13.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to Species A and B. Combination claims 36-38,

Art Unit: 2871

drawn to an image display device having the backlighting panel of Species B, will be examined with Species B.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
